Data Security:

In today's increasing mobile world where private and confidential data are stored digitally, one cannot deny that data security is an important yet overlooked issue in many environments. On many occasions, cumbersome restrictive techniques and expensive deployments are typical reasons for data security to be compromised.

Ease of Use:

The BioSlimDisk Signature is equipped with unique patented fundamentals such as unique fingerprint recognition, truly driverless, zero footprint, password-free and cross platform compatibility; effectively ensuring users and administrators spend more time using the solution instead of exploring its features.

Encryption Methodology:

Unlike conventional software based encryption methodology employed by many USB flash drive manufacturers, the BioSlimDisk Signature employs a robust hardware cryptographic engine that performs AES 128 bit encryption / decryption of your data on the fly (transparent to the user) without the need of any software or application.

Enhanced Security Protection:

In addition, enhanced security protection including power management, entry guard, temper protection, on-board fingerprint processing and recognition.

Signature

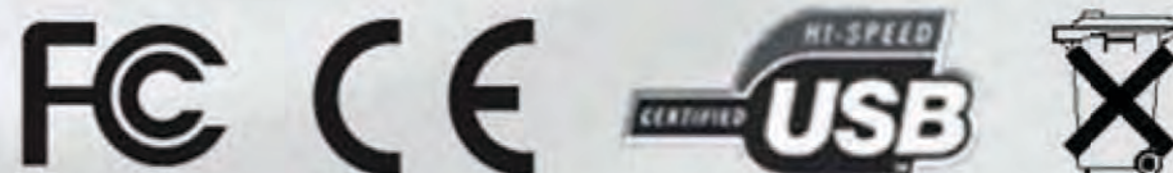

SPECIFICATION

Interface: USB 2.0 and backward compatible with USB 1.1
Data transfer speed: Read speed up to 24MB/s,
Write speed up to 16MB/s
Dimensions: 77mm (L) x 28mm (W) x 13mm (H)
Wight: 30gm

Crypto standard: Advance Encryption Standard (AES)

FEATURES

Compact and light
Easy to install and use (plug and play via USB port)
Biometrics security prevents unauthorized access to data
On-board fingerprint processing and authentication
No external power supply
Support Win 98, Win ME, Win 2000, Win XP, Win Vista, Win 7
Mac OS 9.2 or better. Linux kernel 2.4.x or better

Europe Office
Scholtenhagenweg 25, Haaksbergen 7481 VN, The Netherlands
